

# BRAND STYLE GUIDE

Colours, type, components, imagery, and voice  
for Bitrealm LLC and [bitrealm.io](https://bitrealm.io), written down  
so the site, print, slides, and email match.

# Dark, monospaced, one accent.

The brand reads like a terminal in a dark room: black ground, pale mint text, and a single coral accent that marks the one thing to act on. It looks like what the work is: software, measured and unhurried. No gradients on text, no photos of people, no second accent colour.

## Wordmark

The wordmark 'BITREALM' is displayed in a white, monospaced font. To the left of the text is a coral-colored icon consisting of a square bracket with a small square in the center.The wordmark 'BITREALM' is displayed in a white, monospaced font on a light mint green background. To the left of the text is a coral-colored icon consisting of a square bracket with a small square in the center.The wordmark 'BITREALM' is displayed in a black, monospaced font on a coral background. To the left of the text is a coral-colored icon consisting of a square bracket with a small square in the center.

**Mark.** A coral square between two coral square brackets, on a 24-unit grid. The brackets run from y 2 to y 22, 3 units thick, with 5-unit arms, at x 3 and x 21. The square is 5 by 5, centred at (12,12). One bit, held in brackets.

**Word.** BITREALM in IBM Plex Mono Regular, uppercase, letter-spacing 0.06em. The mark sits on the cap height, gap of 0.4em. Write "Bitrealm LLC" in running text; use the uppercase form only as the wordmark.

**Tagline.** "Software that ships." Sentence case, with the full stop, in Mint. It may sit under the wordmark or stand alone as a heading.

**Clear space.** Keep one mark-width free on all sides. Minimum height: 16px on screen, 5mm in print.

**Colour.** Coral mark with mint word on black is the primary lockup. On a mint or coral ground the whole mark goes black. Never white on coral (2.9:1, fails contrast) and never a coral word.

## Seven core colours, two supporting.

Black is the ground. Mint is the ink. Coral is the only accent and it means “act here”: buttons, the accent bar, the mark, a headline number. Everything else is a grey with a touch of green so it sits well next to mint.

|                                                                                        |                                                                                            |                                                                              |                                                                                                          |

### Depth gradient

Used behind the hero graphic and the background panel. Vertical, top to bottom: #000000 0% → #000000 30% → #010B17 50% → #101C29 67% → #3C5264 80% → #B2C5D3 100%. Text sits only over the black top half. Never use it behind cards or under body copy.

### Contrast (WCAG)

| Pair                            | Ratio         | Use                                     |
|---------------------------------|---------------|-----------------------------------------|
| Mint on Black                   | 20.2:1        | Body and headings                       |
| Mint on Surface                 | 16.8:1        | Card text                               |
| Mint on Slate                   | 8.3:1         | Text on filled cards                    |

| Coral on Black · Black on Coral | 7.0:1         | Headline numbers, accent · button label |
| Black on Coral dark             | 4.5:1         | Hover state, still AA                   |
| Mint on Coral                   | 2.9:1         | Fails. Button labels are always black.  |

# IBM Plex Mono, and only that.

One family at two weights. Regular (400) for everything; Medium (500) only for the display heading, headline numbers, and bold runs inside a paragraph. Open Font License, free for commercial use, on Google Fonts. Self-host the two woff2 files; do not load from Google at runtime. Fallback stack: ui-monospace, "SFMono-Regular", Menlo, Consolas, monospace.

# 2026

## Rules

Sentence case everywhere except the display heading and the wordmark. No italics (the family is loaded without them). No letter-spacing on body text. Measure 60 to 70 characters. Headings never wrap past four lines; cut words before shrinking the size. The justified display heading is a deliberate quirk of the brand: keep text-align: justify with text-align-last: left, and accept the gaps. Sizes above are screen sizes; samples on this page are scaled to fit.

# Buttons, pill, cards, bar.

## Button

hello@bitrealm.io

hello@bitrealm.io

Coral fill, black label, 14px, radius 6px, padding 12px 26px. Hover: Coral dark. One per screen region. There is no secondary button; a secondary action is a plain underlined link in Ash.

## Nav pill

Software   Contact

Surface fill, radius 6px, links 14px Mint, 12px vertical padding. The button sits outside the pill, to its right.

## Accent bar

A 3px Coral rule on the left of a text block, 22px gap. Used when a heading sits left and its text sits right.

## Card, outlined

### Message Crate

Surface fill, 1px Slate border, radius 8px, padding 24px. Icon box 48px, 1px Mint outline, radius 6px, 1.2px stroke icon.

## Card, filled

### Contact

Slate fill, no border, same radius and padding. For overlapping a hero or gradient where the outlined card would vanish.

## Rules

Section dividers are 1px Slate. The footer divider is 1px Mint, full-bleed. Layout: max width 1200px, 48px side gutters, 12-column feel with 32px gaps; cards four across, two on tablet, one on phone.

A point cloud over the depth gradient.

# SOFTWARE THAT SHIPS.

Bitrealm LLC · Orlando, FL

**What it is.** Small near-white dots (#EEF4FF, 25 to 100 percent opacity, radius 0.8 to 2.2px on a 1920 grid) in three layers: a sparse field, a few dense clusters, and dotted lines running vertically and along shallow diagonals. It sits on the depth gradient, black at the top fading to pale slate at the foot.

**Why.** Structure emerging from points. It is also the one place the brand allows something other than flat colour.

**Rules.** Text goes over the black upper half only, in Mint. Never put a card or body paragraph on it. The graphic is generated from a deterministic seed and can be regenerated for other crops; do not replace it with stock footage or a photo. Motion is optional: if animated, drift the dots slowly, no flashes, respect prefers-reduced-motion.

**Licence note.** The graphic is an original asset and is safe to reuse anywhere.

## Say what the work is. Stop.

Short sentences. Plain nouns. Numbers where they exist, none invented. Write “Bitrealm LLC” or “the company” for the entity; no “I”, and no “we”. No adjectives that cannot be checked (“cutting-edge”, “world-class”). The reader wants to know what the company is, what it publishes, and how to reach it; tell them that.
